Follow this model for a journal article from an electronic database such as InfoTrac. For information on citing online newspaper or magazine articles, see model 37. A citation for the article on the opposite page would include the following elements:

1. **Author.**
   - List the last name first. For multiple authors, see model 2.
   - Example: Wallace, Maurice.

2. **Article Title.**
   - Enclose the title and any subtitle in quotation marks. Place a period inside the closing quotation marks.
   - Example: “Richard Wright’s Black Medusa.”

3. **Periodical Title.**
   - Italicize the journal title. Exclude any initial A, An, or The. Do not put a period after the title.
   - Example: Journal of African American History

4. **Print Publication Information.**
   - List the volume number and issue number (if any), separated by a period; the date of publication, including the day (if given), month, and year, in that order; and the inclusive page numbers.

5. **Name of Database.**
   - Give the name of the database, italicized.
   - Example: Expanded Academic ASAP.

6. **Medium.**
   - For an online database, use Web.
   - Example: Web.

7. **Date of Access.**
   - Give the date you accessed the article (day, month, year), followed by a period.
